Join the 3D Printing Revolution

Sculpteo prints your models in 3D easily! We are committed to bring you the best quality for your 3D printed models and work with the best technologies currently available on the market. Rapid Prototyping has a real meaning for us. We are fast, efficient and we ship anywhere in the world. You'll receive your object in a few days. Discover our services and upload your file for a real-time estimation.

Gain time by directly using your source files.

Our technology works with most 3D files used by 3D modeling software and keeps shape, colors and texture as you designed them.

Learn how to take the best of 3D printing. Print your first 3D model in 10 minutes for just £2.50. A real-time estimate!

If you've got close to £1,000 to spare, or have a hacker mentality and like to build things, then you may already have your own 3D printer creating physical versions of digital objects you've designed or downloaded from the web. But if you find using your old inkjet printer a challenge, or don't have the spare cash, Sculpteo offers an alternative. It's a cloud-based 3D printing service that will print designs – yours or otherwise – for you.

The website provides an excellent overview of what 3D printing is and how it works, and there's a viewer that lets you upload a model file from your computer and check what it would look like. You can even embed the viewer in your own website or blog for sharing with others. There's also a Sculpteo app for your smartphone, and a set of workshops that take you through the process of creating a model. Let the 3D printing revolution begin!
